

UTANG PATEL

Ahmedabad, Gujarat, India | +91-9327064863 | utangpatel@gmail.com | GitHub: github.com/Utang-Patel | LinkedIn: linkedin.com/in/utang-patel-217167255

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in developing responsive web applications using Python, JavaScript, HTML, CSS, Bootstrap, Django, MySQL, and PostgreSQL. Skilled in backend development, database design, REST APIs, and CRUD operations. Passionate about building scalable software solutions, solving real-world business problems, and continuously learning modern technologies.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Frontend: HTML5, CSS3, Bootstrap
Backend: Django, REST APIs
Databases: MySQL, PostgreSQL, MongoDB
Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook
Python Libraries: NumPy, Pandas, Matplotlib, Scikit-learn
Soft Skills: Problem Solving, Communication, Teamwork, Collaboration

EXPERIENCE

- Python Development Intern** — *SaiKet Systems (Remote)* 15 Dec 2025 – 15 Jan 2026
- Developed Python-based applications and implemented backend functionalities.
 - Worked with Python programming concepts, debugging, and problem-solving techniques.
 - Assisted in developing and improving application features.
 - Collaborated with team members while following software development best practices.
- Data Analytics Intern** — *CodeAlpha (Remote)* 10 April 2026 – 10 May 2026
- Performed data cleaning, preprocessing, and analysis using Python.
 - Generated insights through data visualization and analytical techniques.
 - Worked with datasets to improve data accuracy and reporting.
 - Utilized Python libraries such as Pandas, NumPy, and Matplotlib.

PROJECTS

ERP System - Shree Dhanlaxmi Traders

- Developed a business-oriented ERP system for managing employee records and attendance to simplify administrative operations and improve organizational workflow.
- Engineered an ERP system to manage employee information, attendance records, and administrative operations.
 - Designed and implemented responsive user interfaces using HTML, CSS, Bootstrap, and JavaScript.
 - Built database-driven functionalities using MySQL for efficient data management.
 - Implemented complete CRUD operations for employee management and attendance tracking.
 - Developed daily and monthly attendance management features for real-world business requirements.
 - Structured and optimized the database schema for scalable and maintainable data handling.

Technologies Used: HTML, CSS, Bootstrap, JavaScript, MySQL, Git, GitHub

Ride2Go - Ride Booking App UI/UX Design

- Designed a complete UI/UX prototype for a ride-booking application, inspired by real-world transportation platforms, using Figma with AI prompt-based design generation.
- Designed a responsive and user-friendly interface for a ride-booking application using Figma.
 - Created key screens and flows including ride booking, tracking, and user onboarding.
 - Used AI-assisted, prompt-based design generation to rapidly prototype and iterate on layouts.
 - Focused on intuitive navigation, visual consistency, and clean interface design.

Technologies Used: Figma, AI-Assisted Prompt Design

OSINT Data Analysis Project

- Developed the backend and database for an OSINT investigation application, integrating external intelligence tools to collect and manage publicly available information.
- Developed the backend and database of an OSINT application using Python, Django, and MySQL for storing and managing investigation data.
 - Integrated the Have I Been Pwned (HIBP) API to detect whether an email address appeared in known data breaches.
 - Implemented WhatsMyName and Holehe to identify usernames across platforms and discover services linked to an email address.
 - Designed and managed the MySQL database, storing investigation results and generating reports for easier analysis and record keeping.
 - Collaborated with the frontend team (built using Dart) by developing backend APIs, handling business logic, and integrating external OSINT tools.

Technologies Used: Python, Django, Dart (Frontend), MySQL, HIBP API, Holehe, WhatsMyName, Git, GitHub

EDUCATION

- Master of Science in Information Technology** — *GLS University, Ahmedabad* July 2025 – Jun 2027
CGPA: 7.6
- Bachelor of Computer Application** — *Institute of Advanced Research (IAR), Gandhinagar* Aug 2022 – April 2025
CGPA: 7.50

CERTIFICATIONS

- Deloitte Australia - Data Analytics Job Simulation:** Completed a virtual job simulation focused on business problem-solving, dashboard creation, and data analysis.
- Tata - Data Visualisation: Empowering Business with Effective Insights Job Simulation:** Gained practical experience in data visualization, dashboard development, and presenting business insights.
- AWS S3 for Web Hosting and Automation Workshop - GLS University:** Learned cloud storage concepts, static website hosting, and automation workflows using Amazon S3.
- SAWIT.AI by GUVI:** Completed AI fundamentals training with exposure to modern AI tools and practical applications.

HACKATHON

- Odoo Hackathon 2026** — *Participant, representing GLS University, Ahmedabad*
- Participated in the Odoo Hackathon and developed AssetFlow, an ERP-based Asset Management System.
 - Collaborated with a team to design, develop, and present a functional prototype within the given timeline.
 - Contributed to backend development, database design, and core business logic implementation.
 - Strengthened practical skills in software development, teamwork, problem-solving, and project presentation.
